This video game was created by InterAction Studios and was released by . Category:2002 video games Category:Microsoft games Category:Arcade games Category:Video games developed in the United States Category:Windows games

Q: How to retrieve not nullable value from GridView using C# I have a GridView control in my webform and using the asp:sqlDataSource control. I am trying to retrieve the value from the GridView using the below C#. `int UserId = Convert.ToInt32(GridView1.DataKeys[e.RowIndex].Value);` The problem is, this does not retrieve the value if the user does not fill the textbox. What would be a work around to solve this problem? A: Either validate the entered value first and then proceed (like this answer), or catch the exception that is thrown in case the user enters an invalid entry (what you actually mean by "retrieve the value").

Effect of environmental temperature on myocardial ischemia-reperfusion injury in neonatal rats. The incidence of neonatal myocardial ischemia-reperfusion (I/R) injury is low but increases dramatically following heart surgery in neonates. This study investigates the impact of environmental temperature on cardiac and myocardial oxygen consumption, infarct size, and contractile function in neonatal rats. Four-day-old rats were exposed to a controlled temperature of 20 degrees C (n=14) or 35 degrees C (n=14) and then subjected to 30 min of left coronary artery occlusion and 24 h of reperfusion. Body temperature was kept at approximately 38 degrees C throughout the study period. In myocardium exposed to 35 degrees C, subendocardial/subepicardial contractile function was not impaired, tissue oxygen consumption increased by 12%, lactate dehydrogenase release was significantly reduced, and infarct size decreased by 28%. Myocardial oxygen consumption increased by 25% in hearts of animals exposed to 35 degrees C compared with those exposed to 20 degrees C. Changes in contractile function, myocardial energy metabolism, and infarct size were similar to those previously reported in adult rats. In conclusion 2d92ce491b
