Motorsport's iconic windmill has traditionally been the meeting venue for all of the Arab world's leading annual showpiece meetings including Gulf Racing Championships, Gulf 1000s and Gulf Le Mans Series races, and a stand is long overdue. It is understood that in recent years the relatively small scale of the event has seen it not only pass underneath the windsail, but just inside the perimeter track on occasion. This means neither the 'signal tower' nor the balconies provide a truly vantage point for the spectator and the view is consequently blocked. The opportunity to present the full capabilities of the new track during an official showcase event could well provide for the first time, a truly unique opportunity for fans of the sport to witness not only the future of motorsport in the Middle East, but also a race meeting worthy of a world-class event. A campaign has already been launched to reinstate the windmills at the Dubai World Cup and once again, either at the original site, or on a different circuit where the stands can remain open. The story is exclusive to SDN. The Dubai World Cup is one of the key highlights of the four-day racing programme, joining the traditional evening race at the height of the UAE festival celebrations. It has attracted a full field and a tantalising prospect of thrilling world-class racing on the Formula 1 circuit. The new F1 track is part of a dramatic transformation of the two-mile circuit, but the Dubai World Cup will be the first F1 race on the track since the South West Asian GP in 2010. Formula 1 has been a driver-led series since its inception in 1950 with an active involvement of the teams, and in previous years there has been the same level of on-track development with track-specific tests being conducted ba244e880a
