According to technical analysis, when an analysis of past price action gives a positive indication that a price will continue to rise, a trader can buy (going long) a stock. The opposite action is called a short position, when a trader sells shares to reduce the risk. Although this means a potential loss, many traders try to generate a profit. If, however, the price action is showing a clear downtrend, the trader will try to sell, so he can offset the position with a profitable trade. stock market technical analysis in tamil pdf stock market technical analysis in tamil pdf stock market technical analysis in tamil pdf stock market technical analysis in tamil pdf Fascinating Topic: Stock Market Analysis in Tamil.
