O Kadhala Kanmani is a 2015 Indian Tamil-language romantic comedy film written, produced and directed by Mani Ratnam. This invention relates to an apparatus for combining two single lens reflex cameras which include lenses of different focal length to produce an image of an object on two film sheets simultaneously exposed with a single photographing operation. In general, in a single lens reflex camera in which a photographing lens system and a finder optical system are integrated, and in which only a first negative film and a second positive film can be exposed in a single photographing operation, an image of an object to be photographed is formed on the first negative film, while a finder image is formed on the second positive film. Therefore, the single lens reflex camera can not provide two negative films simultaneously exposed with a single photographing operation, and it is impossible to combine two single lens reflex cameras.
