In 2013, the games began with Sword & Sworcery EP, a 2D platformer featuring music and art by the brothers. The initial development cycle was much shorter than usual, and the game was released at PAX East in 2013. Development continued with Superbrothers: Sawed-Off Shotgun + Superdagger Sword. The Game was released on PC on February 21, 2014. In 2017, Sword & Sworcery EP was converted to high-resolution 3D in order to support a modding effort to port the game to the Unity engine. Music The title music in the original, Sword & Sworcery, was composed by Peter McConnell. McConnell, along with several other people who worked on the title music, composed the soundtrack to The Wolf Among Us. The soundtrack was released by Music Lovers Underground on April 26, 2013. The theme song for the Superbrothers: Sword & Sworcery EP version is "Up in the Old Tavern," and was composed and performed by Michael Laughlin. The piano version of the song, "The Tavern," was included in the soundtrack released by Music Lovers Underground on April 26, 2013. The song is a heavily rearranged instrumental version of the game's main theme. Other versions Showing Up is an interactive short film by David Fincher about a group of people at a dinner party who react to a piece of music. It features Nathan Barr as a choirboy trying to sing along to the piece in the original version of Sword & Sworcery. Showing Up was released on video in late 2013, along with a few other videos about some of the game's other themes, such as the game's background and narrative.
