excel file to text converter. The present invention relates to certain pyrrolo[2,3-b]quinolines which selectively bind to dopamine receptor subtypes. This invention also relates to pharmaceutical compositions containing one or more of these compounds and methods of treating affective disorders by administering these compounds to patients in need of such treatment. Dopamine is a neurotransmitter that is important in many brain functions. Dopamine is particularly involved in motor functions, sensory functions, cognitive functions, and affective states. Dopamine is also a major inhibitory neurotransmitter in the central nervous system. Brain cells use dopamine to send signals to other cells. When the brain cells are stimulated, they produce dopamine
