What's New in the Calendar Program Pro?

Calendar Program Pro: This is a small software application which helps individuals manage their time more efficiently, by adding appointments and meetings to a calendar. This is a portable tool, meaning that you are not required to install it on your PC. As a result, the Windows registry and Start menu/screen are not going to be affected by it in any way whatsoever. Aside from that, you can use Calendar Program Pro on any computer you have access to, by moving the program files to a USB flash drive or other similar portable storage unit. This software utility supports multiple calendars, with import from file formats such as CDB, DAT or CSV. It is possible to export a user-input period of time to CSV and HTML. The interface is plain, consisting of a preview panel and a calendar view of the current month, as well as the previous and next ones. The default calendar comes with some built-in events, mostly American holidays, such as Easter, Christmas, Valentine's Day, and Halloween. It is possible to add new events by inputting details such as title, notes, type (birthday, anniversary, to-do etc.), start date and time, and recurrence. A search function is incorporated, you can hide empty months, start the app minimized, set the first day of the week, show time in status bar, display week number, as well as customize the font, all colors and skin. All in all, Calendar Program Pro is a software application which enables you to manage your time in a more efficient manner. It does not put a strain on your computer's performance, response time is good and it can even be password-protected.
