KEYMACRO Audio Engine Xeno: Universal Audio Engine HALO: Universal Audio Engine CA6X This was a very nice headphone amp. It sounded good, clean and powerful. I am sold on it after my first listening. I had a lot of fun setting up my music and then listening to everything and also comparing them. It was a "must have". I would highly recommend this amp to any of my friends. Its a great deal for the price. If anyone wants to test this amp (it would be a good review) send me an email at: bobinsideman0@yahoo.com Take care. Bob S. Audioforest On 27 October 2017, Audioforest responded: Audeze XO2: XO2 DAC: Audeze High-End DAC XO2: Audeze High-End Headphone Amplifier This amp was designed for small to medium sized rooms, for headphones, to compliment your DAC or streamer. This sounds amazing in a medium sized room. It's small,

lightweight and easy to install, 3 times more powerful than a typical headphone amp. This would be a great upgrade for any system. The XO2 would be used for all the music listened to. I love the results I am hearing now. I even like the pink one with orange. I did have to turn the volume up on this amp, but that's not a problem. I highly recommend this amplifier. 6 Responses to My Thoughts on the XO2 Oh Bob, I'm pretty sure this amp was never up for review. I'm surprised you found it given you claimed you weren't able to contact them. Bob, you are a great reviewer and that's how you should be reviewing and reviewing people. This was one of the best sounding amplifiers I've heard so far for a lot less money, and you know I love quality. I bought one of these and it's great! Some of the reviews seemed to be biased, but I was a little concerned because I didn't have a lot of music experience and I don't know how to get the best sound, and I didn't want to be disappointed. I went with the XO2 over the P5 because I really liked the way it sounded. The P 1d6a3396d6
