Play 3GP files directly from your USB drive and put any other application to the background. You can use your new awesome browser to do real-time video-chat from your smartphone or turn your mobile phone into a portable music player for your laptop or PC. It is very easy to use, yet includes all features of playback that you would expect from professional video players. Play from USB Drive: Convert your video files to 3GP format. You can now save your video files directly to your USB drive and play them directly from there with 3GP Player. This is a much more convenient way to watch your video files on a PC or laptop than opening the folder, copy-pasting the files and watching them from a browser. Turn any Application Into a Flash Player: 3GP Player can turn any application into a Flash Player. Just drop your video file onto the target app, and you can now play that file from the application itself. Share Files with Your Friends: 3GP Player allows you to transfer your video files to your friends, so you can share your favorite YouTube videos with your relatives, friends, and so on. It works with any operating system that supports flash player, such as Windows, Mac OS X, Linux, Android, and more. Direct Connect to your Phone's Camera: Now you can put your video camera to the background. Capture the moment with your phone, and transfer the video file directly to your PC. Play Video Files from Disc, ISO, and Drive: 3GP Player works great on windows, Linux and Mac computers. It supports ISO images, Disc images, and any other media that you can play on a computer. Convert Movie to Video (MPEG-4 or 3GP): Convert a movie to 3GP file. 3GP Player can also decode MP4 files to 3GP. Share files to USB Drive and App: Transfer files to your USB drive and play them from your USB drive. Convert and share any files between your PC and your USB drive. Embed Web-browsing in your Flash Players: It's much easier than ever to use any web-browser to play videos and music. 3GP Player can now turn any web browser into a flash player. Built-in Subtitle and Audio Delay: 3GP Player allows you to subtitle and audio delay embedded video. OverScan: Insert a black bar at the top and bottom of the video. OverScan can be rotated with 1d6a3396d6

3GP Player is a 3GPP-compatible video player. 3GP Player supports several 3GPP standards including 3GPP2 CODEC1,3,4,5,6; 3GPP2 Video CODEC and Video WMC (V4L2), as well as several combinations of these codecs such as MPEG-4 V4L2 and 3GPP2/3GPP2/3GPP2/CODEC1/CODEC1/CODEC4/CODEC5/CODEC5/CODEC4/CODEC4. MPEG-4 and H.263 Video Players (3GPP, 3GPP2 and Video WMC) 3GP Player supports MPEG-4 (ISO/IEC 14496-1, 14496-2 and 14496-3) and H.263 video compression. The following 3GPP1/3GPP2/3GPP2/V4L2 compatible video codecs are supported by 3GP Player: 3GPP1/3GPP2/3GPP2/V4L2 compatible video codecs MPEG-4 Video (ISO/IEC 14496-1, 14496-2 and 14496-3) H.263 Video Fully supported 3GPP2 video and audio playback: 3GPP2 CODEC1/CODEC1/CODEC4/CODEC5 3GPP2 Video CODEC 3GPP2 Video WMC (V4L2) Video Capture Video capture can be used to generate a video file of either a live feed (streaming) or a recorded video (timelapse). This feature has the ability to stream a video capture from a webcam. The video will be stored into a file within the system's temporary folder. 3GP Player also has the capability of saving the video to a user defined folder. 3GP Player has the ability to use a webcam as a video source and can record audio via the microphone of a webcam or phone. Frame step and speed controls 3GP Player has the ability to frame step through a video at a selected speed. You can choose from any of the following speeds: 1, 2, 4, 8, 16, 32, 64 and 128 frames per second (fps). 3GP Player also has the ability to zoom or change the aspect

What's New in the 3GP Player?

As the title of this program implies, 3GP Player lets you play video files with the 3GP format in a user-friendly interface. The interface of the application is standard and comes with simplistic elements. 3GP clips can be imported by using either the file browser or the "drag and drop" method. So, you can create and save a playlist, pause and stop the clip, navigate back and forth within the video, as well as play the next or previous track. Furthermore, you can adjust the volume, switch to full-screen mode, zoom in and out, and go to the playlist window. In addition, you can view file properties (e.g. size, length, format, bit rate), disable the toolbar, enable 3GP Player to stay on top of other processes, enable repeat mode, set post-playback actions (close window or turn off the computer), and more. In the "Options" area you can clear recent files and playlists, enable 3GP Player to load the last playlist at startup, allow duplicate items in the playlist, make file associations, customize the theme of the player, and others. The lightweight tool takes up a low-to-moderate amount of system resources, has a very good response time and didn't freeze, crash or pop up errors during our tests. Unfortunately, there is no help file available. Otherwise, we strongly recommend 3GP Player to all users. | Solvusoft's Demo Center Software downloads related to 3GP Player 3gp Player can convert many file types in a matter of minutes and it is easy to use. 3gp Player is a powerful tool that has the ability to convert videos from and to 3gp. Convert video formats to 3gp formats. Convert video formats to 3gp formats with just a few clicks. Convert 3gp videos and 3gp AVI files from one format to another, convert your 3gp videos to AVI, WMV, ASF, MPEG, 3gp, MP4 and burn them to CD/DVD. 3gp Player is a powerful tool that has the ability to convert videos from and to 3gp. 3gp Player is a powerful tool that has the ability to convert videos from and to 3gp.
