You can assign a message to a specific folder by searching it in the dedicate section, then just type the folder name you want to assign the email to, and then click the Assign button to complete the process. The tool allows you to find emails with a specific topic and attach a note to them at the same time. Let me just start by saying I have never used this software before. My mother in law bought it for me as a gift. She was getting frustrated with getting into my computer and looking for that particular app. She needed a simple way to track what she wanted to do and see when. So, I downloaded and started reading the directions. After I tried the first step and was not able to do it, I put the program down and decided that I did not need something that complicated for something as simple as finding her emails. After having been married for over 25 years, my wife and I made a decision to have a child. I purchased this program at the time the decision was made because I wanted to keep track of the child's milestones. I used it for that purpose for 2 months before I decided to use it for something else. In the beginning it was a little confusing to me. The functionality is very basic. But if you don't use it for months and are a little unsure of how to use it, after a while you will get the hang of it. I believe that a lot of people that have bought the program are afraid of it and won't use it because they are afraid they won't be able to understand how to use it. That fear is actually a very good thing. If you put down the program, you will not understand how to use it. You will have to ask how to use it. That is a good thing because if you don't know how to use it, then you probably don't need it. If you need a quick way to keep track of your tasks, this may be the program for you. It takes a few minutes to learn how to use it. If you need to keep track of important things, like your emails, this is the program for you. I use this software to keep track of my life and then my business. I find it to be very helpful. I use the calendar, notes, and tasks to keep track of my life. I use the notes and tasks to keep track of my business. I use the notes and tasks to keep track of what I
