### What's New in the Email Address Filter?

Email Address Filter is a handy and easy-to-use application designed to help you manage your email list with minimal efforts. Email Address Filter can delete invalid email address and duplicate email address from your email list. This means you can get a clean email list, and save your time and mail sever to send email to your customer. It only does 1 job: Remove invalid email addresses and duplicate email addresses from your email list. For example: You will receive an email from "random email sender" with an invalid email address such as "1@1.com" or "8@8.com", but you will not receive an email from "random email sender" with a valid email address such as "mail@mail.com" or "email@email.com" If you have duplicated email addresses in your email list, they can get removed easily by using this application. You may get some errors or warnings when you use this application. It is normal. It will not affect your email list. You can keep using your email list after your warnings. If you want to keep using your email list after using this application, you may skip "Remove Duplicate Emails". How to use: Click the "Select" button to select an email list. Click the "Send Invalid Email Address" button to delete invalid email addresses from your email list. Click the "Send Duplicated Email Addresses" button to delete duplicated email addresses from your email list. How to Keep Using your Email List After Using This Application:
