Dec 28, 2021 MT Power 2 is a powerful drum kit. It is the next step in the line of powerful drum kits. MT Power 2 does not have the lowest sample rate out of all of the kits, however, that does not matter. This drum kit was created with powerful samples so the levels can be adjusted to match the original recording. Aug 10, 2020 I am using a Win10 laptop with two outputs, one on hte left and right sides of the sound card and the other to feed the monitor, a cheap system, and I can't seem to get any sound out of it whatsoever. I have the tube connected to the hte guitar input, microphone connected to the headphone input, and I have the gain at 11 on the hte monitor and the level at 10 on the hte sound card. When I plug the MT Power2 in, the distortion is loud on both speakers and the monitor, but does not affect the output from the sound card (the only way I can get sound out of it). How do I get that distortion out of my output? -- MT Power 2 does not have the lowest sample rate out of all of the kits, however, that does not matter. This drum kit was created with powerful samples so the levels can be adjusted to match the original recording. My computer has one speaker on the right, one on the left, and a monitor and I only have one output on the card (I don't have a USB sound card). This drum kit is awesome, but in order to get the best sound out of it, I need to be able to take that tone from the top head kit and have it feed my monitors. It is a huge pain in the ass since I
