Mint 17.3 is a great operating system for those users who are looking for something pretty close to Windows 10. It will turn any Windows 10 user who is bored with the constant notifications and updates into a linux fan. The only problem is that it is being developed by a small team of developers in India. The program uses Ubuntu 17.10's Ubuntu Software Manager application that manages the software it comes with. This means that if there are any updates, then they will be available through this application. What's better in Mint 17.3 is the way it is easy to install the drivers for your hardware. For example, if you are using an Intel card and it is not working, then all you have to do is click on the hardware drivers
