What's New in the PNG Mask?

Hide data in the PNG files that you create. Features: - Uses a single XOR encryption, which is a secure and efficient way to encrypt files. - Steg1&Steg2: when using the Steg1 method, the hidden data is encrypted using the first 8 bytes of the image, and when using the Steg2 method, the data is encrypted using the last 8 bytes. You can use the Steg3 method for combining these two methods. - Optional Link List: you can also create a link list and hide sensitive data using the link list. - Optional Text: using this method, you can hide sensitive data using a plain text string. - Optional Embed: if you use the Embed method, the hidden data is embedded in the image as a base64 string. - Several steganography methods. - RAR archive support. What is single sign on? The concept of "single sign on" is quite simple. Before accessing a secure Web site, or opening a program that requires a password, you enter your username and password to a single page or software program. Once you are logged into the service, you do not have to enter a password again, and are automatically signed on. Single sign on is not a new idea. A number of Web sites that require authentication have been offering their services since the early 1990's. However, most of these services were proprietary and expensive. Single sign on is also not a new concept. It has been available in proprietary programs for years. What the open source community has done is create a single sign on service, that's free and fully integrated into your Web browser, that you can use in your own programs. Download Single Sign On now! Features: - Full compliance with the most common open source software standards - Portable for Microsoft Windows and Linux - Speed and performance - it runs very fast, while still providing an easy-to-use interface - No installation required - Works on the Internet, and also as an Internet server - Support multiple authentication methods, including SSPI, and NTLM - Can manage multiple users - Easy to customize, to make it your own - Support for multiple browsers and operating systems.
