SYNCING.NET Crack For Windows is a reliable application that allows you to synchronize Microsoft Outlook accounts across the local network, without using an Exchange Server. The program allows you to create several synchronization folders in Outlook and easily share data with other users in the network. Real time data synchronization SYNCING.NET Torrent Download works with Microsoft Office, allowing you to quickly share messages, contacts, tasks and another type of data across the network. The program is designed to run in the background and ensure the instant data synchronization through the designated folder. The shared directory can be selected from amongst the ones you already created in Outlook or it can be a new folder, especially generated for sync purposes. Alternatively, you can choose a Windows folder to share with other users, containing documents, pictures, media and other types of files. Send invitations for syncing Both Microsoft Outlook and SYNCING.NET Full Crack must be installed on each of the stations you wish to share data with. Invitations can be sent to the email addresses assigned to each Outlook account, for synchronization. The computers using the same account as the one you are configuring, receive an instant invitation to share data in the Outlook Group. Manage the shared folders SYNCING.NET For Windows 10 Crack allows you to view the shared folders in its interface. A dedicated tab allows you to create and configure a new folder for data sharing. Meanwhile, the Outlook tab enables you to manage the email client folder that you selected for synchronization with the other users. Right-click in the Outlook tab allows you to quickly add or remove a member from the Group. Share, sync and communicate with Group members SYNCING.NET Free Download represents a reliable solution for sharing data and Outlook information with authorized users across a local network. The program is easy to use and can perform the synchronization in real-time, so you can instantly access important data from another account, even in offline mode. Limitations: The program supports sync of two Microsoft Outlook accounts at the same time and one account can be assigned to all folders. The Outlook accounts can only be configured manually in SYNCING.NET. The program doesn't support any mobile devices, such as phones and tablets. SYNCING.NET Key Features: Instant synchronization Real time data synchronization Easy to use and manage Manage shared folders Invite friends for sharing data Sync contacts, tasks, messages and other data across the network Send invitations to users for sharing data in the group
