# Supreme.Commander.2.DLC.Infinite.War.Battle.Pack-SKIDROW

Nov 2, 2017 Supreme Commander 2 Codex Infinite War Battle Pack-SKIDROW... How to install the Supreme.Commander.2 DLC on Windows 7 and Supreme.Commander 2 Infinite War Battle Pack - [unclear]Woocommerce[unclear]DLC[unclear]Game? - [unclear].Q: Why not opening the same application twice? The user enters their name and pin number in the application. I'm using socket to connect to an API server. For ex: -User enters name and pin -User click the start button -After some time the server replies with the customer details -If the user clicks the start button again, I should call same API that came after the first start. My question is why don't I ask the user if they want to try the same application again. If the user wants to try the application again, only that API call should be made. Can anyone help me with this? Thanks in advance! A: My question is why don't I ask the user if they want to try the same application again. So you write a new app every time. If the user wants to try the application again, only that API call should be made. I suppose you are doing something like: First time: -User enters name and pin -User click the start button -After some time the server replies with the customer details Second time: -User enters name and pin -User click the start button -After some time the server replies with the customer details Third time The process repeats itself. If your server would be slow (like because it's not implemented well) then you would get a slow application (which is bad for customers). You can solve this by keeping your server.js in memory and make the API call when the user logs out, but you would loose user input (even though the server would be fast). The Canon EOS T6 DSLR Camera with EF-S 18-55mm Lens is a superb travel or travel with friends and a great all round camera. When you purchase the Canon T6 with EF-S 18
