Autodesk use the acronym "DWF" (Design Web Format) to refer to the file format that is produced when a drawing is displayed in a web browser. The term stands for "Design Web Format" and is a designation of the file type rather than a specific file format. Since the release of AutoCAD 2010, the term "DWF" is no longer used. The term "DWF" now refers to the specific format that Adobe introduced to allow AutoCAD to export to PDF. Since AutoCAD released AutoLisp, the name for the programming language that AutoCAD supports. In recent versions of AutoCAD (and AutoCAD LT), it is possible to use this language, instead of the command-line programming, to perform various editing tasks. AutoCAD LT is available on Mac and Linux, and as a subscription service. Autodesk products include 3D and 2D CAD software and drafting tools, digital content creation and management products, educational resources, animation and motion graphics software, cloud computing services, and immersive entertainment software. The Autodesk name is a registered trademark. AutoCAD was originally developed to work on the Xerox Star computer, and then ported to the Apple Macintosh, MS-DOS, Microsoft Windows, and Unix platforms. In recent years, AutoCAD has also been ported to mobile devices (iOS, Android) and the web (through web browsers). The phrase, "just off the drawing board" is sometimes used to describe a product that has been designed by a CAD engineer but has not been tested or approved by other CAD operators. Use of AutoCAD is now widespread in various industries, including architecture, automotive, construction, construction management, energy, manufacturing, mechanical and industrial design, product design, petroleum and petrochemical, real estate, transportation, and utilities. Design Web Format (DWF) is the file format that is produced when a drawing is displayed in a web browser. It was developed by Adobe and introduced with the release of AutoCAD 2010. The term "DWF" is no longer used and now refers to the specific format that Adobe introduced. This format allows the export of AutoCAD drawings to Adobe Acrobat PDF files.
