### What's New in the DigiPaint?

The Photoshop vector effect is a preset that imitates the pencil sketch effect. The result is a dark outline created in black color. In the lower left corner you can see a very good result of this Photoshop effect. DigiPaint Description: The Colorthief is a perfectly smooth and subtle pencil sketch effect. The effect uses 9 transparency levels in order to imitate various shades of a pencil color. This Photoshop effect was selected by Microsoft as a "must have Photoshop tool". In the screenshot below you can see a very smooth and subtle result of the effect. DigiPaint Description: The ColorHue is a Photoshop effect with 9 levels that imitate various tones of one color. The effect creates a very distinctive outline of an image with a color of the original. The selection of colors for the effect's parameters are made by the user. On the image below you can see the result of using a particular combination of colors in the "ColorHue" Photoshop effect. DigiPaint Description: The Seamless is a very unusual Photoshop effect, which imitates the effect created by different marking pens. The effect is not a simple transparency mask but a colored outline. The effects looks very natural and has no lines on the edges. The result looks like a design of a graphic designer who used various styli to create a shape. The effect is a perfect technique to imitate the result of a paper cut. The effect works only in Photoshop. Unfortunately there is no standalone version. DigiPaint Description: The ColorPencil is a very unique Photoshop effect, which imitates the pencil sketch effect. The effect creates a very specific outline created with nine transparency levels. In the lower right corner you can see a very good result of the effect. DigiPaint Description: The Backdrop adds a background that is not necessary to the foreground. There is a possibility to use predefined patterns or photos. The user doesn't need to do anything to the background. In the screenshot below you can see the results of using a landscape photo for a background and the "DigitalColors" pencil effect in Photoshop. DigiPaint Description: The Highlight is a very unique Photoshop effect that can add a very subtle white background to a colored image. The effect is a perfect choice if you want to make a colored image look like a photo. The effect works well with black-and-white

---

## System Requirements:

Intel P4 or faster CPU 1 GB RAM 12 GB HDD (Unmounted) NVIDIA 7 series or better graphics card  
Patch notes: v1.2 Added the Death Blow, Command Trait, Level, and Seasonal Rewards. The Death Blow is a rare Damage Over Time Debuff. The Death Blow ticks away whenever you hit the target with an attack. The Trait you choose at the start of Season 12 determines how often your Death Blow ticks away.
