This is something that many people use often. It's a very fast and easy way to go from one word to another. With the Type Tool, you can quickly create text effects or fonts, so you can quickly replace text in a photo. The Pasting and Cut techniques are used to manipulate images. The Paste command will simply clone an image or paste in an existing file. The Cut command will remove a selection from an image, leaving whatever else to remain. Cut will work only on an active selection. If you want to apply effects to the entire picture, you can use the Eraser tool, which comes in many different versions. The Quick Eraser is very easy to use. The Brush Eraser is more powerful, so you can erase specific areas within the image. The Soft Eraser is for retouching parts of an image. The Pressure Mask is used to control the amount of erasure. You can also use the Expand tool to expand the Eraser tool over a wide area. The Gradient tool allows you to produce a gradient of colors that extend over a certain distance. Gradients can be used for various decorative effects, but they are especially useful for creating wood grain or painting effects. You can apply gradients using either the Gradient tool or the Paint Bucket tool. You can also apply a gradient to an existing object using the Gradient Menu in the Layers Panel. The Stroke selection tool has a wide variety of uses. It will allow you to easily create various edges within an image. It's helpful for drawing shadows, clouds, and creases. It can also be used to create various types of vector shapes. Use a selection to create an outline around an image and then fill the rest of the area with the Quick Selection tool to complete the selection. The Pen tool provides a smooth line with pressure sensitivity. The Pen tool has two variations. The Pencil tool is similar to the Pen tool, except that you cannot change the size of the line. You can only adjust the thickness of the line. The Brush tool allows you to draw lines with different sizes, shapes, and colors. You use the Quick Selection tool to apply a selection to the entire picture or to part of the picture. Then use the Lasso tool to make a box selection. In the Selection panel, you can choose to make a selection that includes or excludes the area in the center of the image. You can also choose to select the original shape
