. Vertical Reality Simulations -FA-18E Superbug X 1.2.1.0 FSX version download . Download game for simulation of the World of Airplanes " F/A-18E Superbug.-5p-induced MDR1 down-regulation and lower their sensitivity to chemotherapeutic drugs. In contrast, we found that overexpression of miR-122 inhibited P-gp protein expression and reversed drug resistance. Moreover, we found that up-regulation of miR-122 inhibited VEGF expression and tumor growth. These results indicate that miR-122 could enhance chemo-sensitivity in breast cancer. miR-122, a liver-specific miRNA, is emerging as a key regulator in cancer, and may play multiple roles in tumors \[@B18]-\[@B22],\[@B25]-\[@B28]\]. Yang et al. showed that miR-122 could target c-Myc, which is a tumor oncogene frequently found in many cancers \[@B28]\]. miR-122 could also repress cell-cycle-related genes \[@B22]\]. In addition, miR-122 inhibited tumor growth in hepatocellular carcinoma, as revealed by a decrease in proliferation and an increase in apoptosis and caspase-3 activity \[@B22]\]. miR-122 expression was also found to be significantly down-regulated in breast cancer cell lines and was suggested to regulate the malignant properties of breast cancer cells \[@B25]\]. Inhibition of c-Myc was identified as a mechanism of miR-122-induced chemo-sensitivity in breast cancer \[@B28]\]. c-Myc-mediated down-regulation of miR-122 enhanced chemotherapy-induced apoptosis \[@B28]\]. Our data in this study showed that knockdown of c-Myc suppressed miR-122 expression and induced drug resistance in breast cancer cells. Conversely, overexpression of miR-122 enhanced chemo-sensitivity by inhibiting P-gp in breast cancer cells. These findings indicated that miR-122 played a pivotal role in chemo-sensitivity in breast cancer cells. It has been demonstrated that miR-122 could target many important genes related to cancer \[@B22],\[@B25]\]. For instance,
