Arden Callihan on Google Plus. "If you have enjoyed 'ÂThe Wolf Among Us' you may have wanted to visit the online game that inspired it.. "Wolf Among Us" is a bit of a mystery, but you might recognize the shoe.. of Wolf Among Us -- which is free to download for iOS devices, but $9.99 on Android -- is an amazing 3D action game.Tim Schafer's death has inspired both sadness and positivity. Gaming journalist Brian Crecente, known for covering the PC gaming world for a number of publications and for occasionally reviewing video games on IndieGameMagazine, shared the following thoughts on the subject: "At first it seemed that Tim Schafer had died of a heart attack, but there's nothing, absolutely nothing, to suggest that this was not a deliberate suicide. Schafer is a man who spent the last 20 years of his life making the best games he could possibly make. In a career full of huge successes, he added The Secret of Monkey Island and Grim Fandango to the industry's greatest game catalogue. Tim Schafer also created Full Throttle, Full Throttle 2 and Day of the Tentacle. His earlier work went on to inspire more recent games such as the Double Fine Adventure series and Broken Age. Tim Schafer is a very, very good developer and he made his final games just to be remembered as one of the greats of the industry. If you liked his games, you will probably have fond memories of the amazing conversations you had with him, the amazing behind-the-scenes artwork that accompanied every studio creation, and of the hours you spent making goofy jokes and goofier jokes to show the world that, in spite of all his career's success, Tim Schafer was an artist, just like his generation of game developers. Tim Schafer may have died from a broken heart, and he is now at peace."Q: Is there any way to use a third party "auth" feature on a page I'm creating a website which requires a user login. Is there a way for me to use a third party login like www.conchang.com A: Auth0 is one of the most popular providers and has lots of different options. A: It depends what you want to do. When using the auth0.com system, it's the basics: 1) User
